## **QUICK START GUIDE – CABLE – SPECIFICATIONS**

DIKABLIS GLASSES 3 CABLE – SYSTEM SPECIFICATIONS

# ERGONEERS

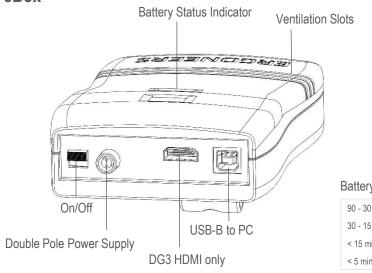

#### **General Specifications**

Operating Temperature Range	5°- 35°C				
Housing Material	Polyamide				
Specifications for the Head unit					
Weight	52g				
Field camera resolution	FULL HD 1920(H)X1080(V) @30fps				
FOV(Horizontal/Vertical/Diagonal)	116°/60°/144.5°				
Eye cameras resolution	648 x 488 (EIA & CCIR)				
IR Frequency/Intensity	875nm/17nW/sr				

Specifications for eBox		
Dimension	165mm × 110mm × 45mm	
Weight	262g	
Power Consumption *	12V(635mA)	
Battery Recording Time ** <90min		
Double Pole Power Supply Lemo 2 pole, 19V/2A		
,	ncluded! DO NOT use the wBox battery to power the eBox. tery while recording with Dikablis Glasses 3.	

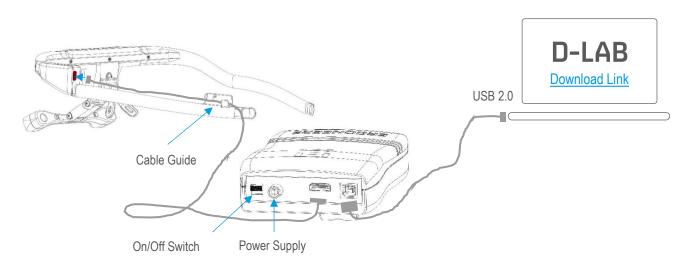

#### eBox

#### **Battery Status Indicator**

## QUICK START GUIDE – BASIC SETUP – CABLE

DIKABLIS GLASSES 3 CABLE - SYSTEM SETUP

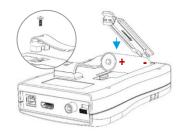

#### Hardware Setup

Use the supplied HDMI cable (3) to connect the Head Unit (4) to the eBox (11). Use the cable guide on the Head Unit to secure the cable.

Connect eBox (11) and Laptop with the supplied USB cable (5). Use the Power Supply (10) or insert a fully charged Nitecore Li-lon battery. Turn on the eBox by pushing the On/Off switch downward.

Optional: - Remove clip

#### **Software Installation**

Download D-LAB Setup from the <u>Ergoneers FAQ</u> page and follow the installation instructions. Connect the license dongle to the D-LAB computer and start D-LAB.

## **QUICK START GUIDE – PREPARATION – CABLE**

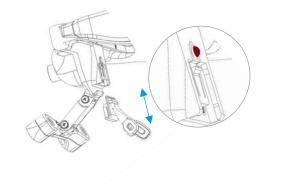

2

#### **DIKABLIS GLASSES 3 CABLE - PREPARATION**

### 1

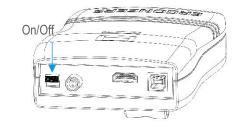

#### Select a Nose Pad

Choose one of the four different nose pads for a comfortable fit of the Head Unit. To remove a nose pad push down the small button above it and slide the nose pad downwards.

### Turn On Dikablis Glasses 3 - Cable

Connect the eBox to power or insert a Nitecore Li-Ion battery. Flip the On/Off switch to turn on the unit. The LED on the front will turn green. If you use a battery, it displays the charge level.

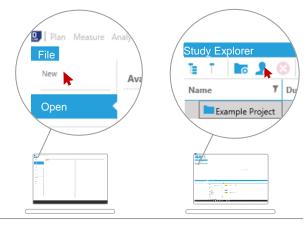

#### 3 Start D-LAB

Start D-Lab. Open an existing study or create a new study and add a Participant in the Study Explorer (Plan mode). Once connected, the Dikablis Glasses 3 will appear in the Recording Devices Window automatically.

## **QUICK START GUIDE – CALIBRATION – CABLE**

**DIKABLIS GLASSES 3 CABLE - CALIBRATION** 

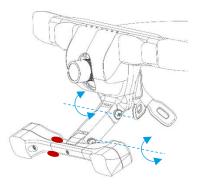

#### Open the Calibration Wizard

Go to the Screen Layout tab and click on Eye Tracker. Drag & drop the Eye Tacker Dikablis Glasses 3 from the Recording Devices window into the empty Eye Tracker visualization. Click on the eye icon with the tick mark on the right panel of the Eye Tracker visualization to start the Calibration Wizard.

#### Adjust the Eye Cameras

Grasp the T-shaped eye camera bar with two fingers (red dots) and rotate / move it until the eyes are horizontally aligned in the center of the eye videos. Work your way through the steps of the Calibration Wizard by using the arrows on the top-right side of the Eye Tracker visualization.

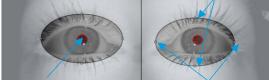

#### Set Pupil Detection Mask

Set the area (mask) of the eye image that is scanned for pupil detection. The size of the mask can be changed by dragging the white dots on the outline of the mask. The mask can be moved by clicking and dragging the white dot in the center of the mask.

Check to ensure that both pupils are tracked at all times during normal eye movements. Use the small arrow on the top right of the visualization to go to the last step of calibration.

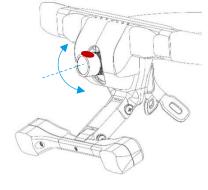

Adjust position

Adjust width

#### Adjust Scene Camera

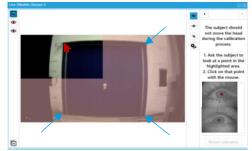

Adjust the angle of the Scene Camera by tilting the lens up or down manually. After this step the relevant areas and the related Markers for the eye tracking study should be visible in the field camera. Rotate the lens to adjust the focus if necessary.

#### 8

#### **Four-Point Calibration**

Choose four calibration points such that each one appears in a different quadrant of the Scene Camera image. Instruct the subject to lock their fixation at the first calibration point and click on the corresponding point within the highlighted quadrant. Repeat this step for points 2, 3, and 4 while making sure that the subject does not move their head. After all four points are clicked, the calibration is complete and the subject may then move their head freely.

## QUICK START GUIDE – RECORDING – CABLE

DIKABLIS GLASSES 3 CABLE - RECORDING

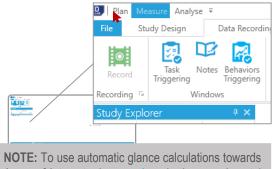

# ERGONEERS

12

#### Switch to D-LAB Measure Mode

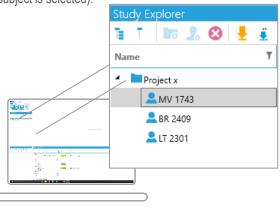

Click on Measure at the very top left corner of D-LAB to switch to Measure mode.

**NOTE:** To use automatic glance calculations towards Areas of Interest, place <u>markers</u> in the experimental environment before starting a recording!

### **10** Select a Subject

Chose an existing subject or create a new one to start a recording (The Record button will only be enabled if a subject is selected).

#### Select Dikablis Glasses 3 for Recoding

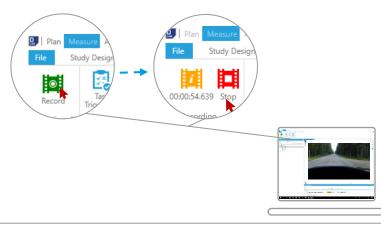

Ensure that the blue checkbox next to Dikablis Glasses 3 is checked in order to record the Eye-Tracker.

**CAUTION:** No eye-tracking data will be saved if this box is not checked.

Recording Devices

Name 7	Status
▲ Audio	
Microphone Array (Realtek High Definition Audio)	Connected
▲ Eye Tracker	
<ul> <li>Dikablis Glasses 3</li> </ul>	Connected
Eye Cam - Left	

#### Start & Stop the Recording

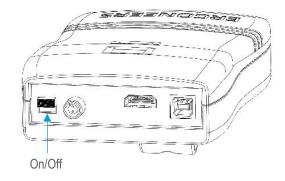

Start the recording by clicking the Record button (Recording tab within Measure mode). The status in the Recording Devices Window will change to green "Recording" for the selected sensors. End the recording using the Stop button.

#### Turn Off Dikablis Glasses 3

Flip the On/Off Switch to turn off the eBox - the status LED on the front will turn off.

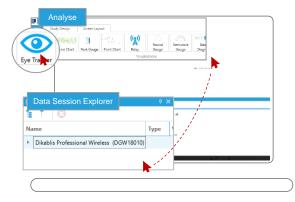

## QUICK START GUIDE – ANALYSIS – CABLE

DIKABLIS GLASSES 3 CABLE – ANALYSIS

#### 14 Switch to D-LAB Analyse Mode

Open an Eye Tracker visualization from the Screen Layout Tab. Drag & drop the Dikablis Glasses 3 device from the Data Session Explorer on to the empty visualization. Then proceed with a quality check of Pupil Detection Rate etc. as described in the "Quick Start Guide – Eye Tracking with D-Lab 3.5" available on the Ergoneers FAQ.

## QUICK START GUIDE – WIRELESS – SPECS

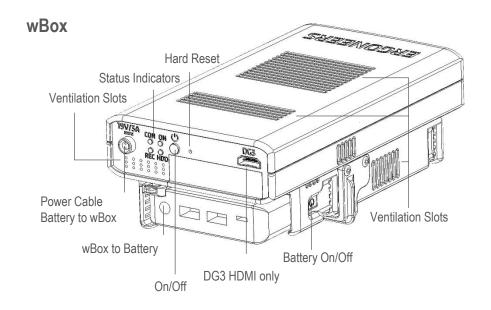

DIKABLIS GLASSES 3 WIRELESS – SYSTEM SPECIFICATIONS

## ERGONEERS

#### **Specifications for wBox and Wireless Accessories**

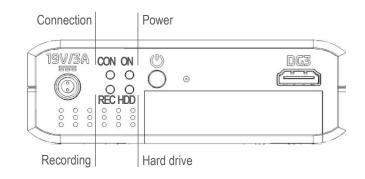

Dimensions (including battery)	35x190x110 mm (70x190x110 mm)	
Weight (wBox + Battery)	750g + 400g	
Storage Capacity of wBox	150GB (approx. 3.5 – 4 hrs recording time)	
Voltage	19V	
Battery Recording Time*	<120min	
Battery Cable Lemo 2 pole, 19V/2A		
Router Specification	Mobile Router Nighthawk <sup>®</sup> M1 by Netgear	
*For a fully charged battery while recording	g Dikablis Glasses 3.	

**CAUTION**: Do NOT block any of the ventilation slots during the recording. In case of overheating the wBox turns off and the current recording will be lost!

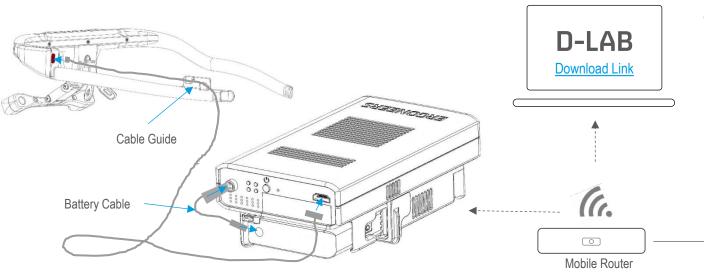

#### Status Indicators wBox

LED	State	Description					
ON	Off	wBox is turned off					
UN	Green	wBox is turned on					
HDD	Off No HDD activity						
עעח	Flashing Green	Active HDD during start, recording or update					
	Off	No connection from wBox to any device					
CON	Yellow	wBox connected to Wi-Fi but not connected to D-LAB					
	Green	wBox connected to D-LAB (ready for recording)					
REC	Off No data recording in progress						
REC	On	Active data recording in progress					

## QUICK START GUIDE – WIRELESS – BASIC SETUP

### Hardware Setup

Use the supplied HDMI cable (3) to connect the Head Unit (4) to the wBox (9) and secure the HDMI cable using the cable guide. Use the Battery Cable (8) to connect battery (7) and wBox (9). Turn on the Mobile Router by pressing the ON button (6) and connect the D-Lab-Laptop to the Dikablis Wi-Fi ("DG3\_*NameOfRouter\_*5G").

FRGUNEERS

FROM SCIENCE TO INNOVATION

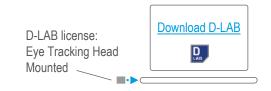

The router displays the password on its screen upon pressing the On button several times.

#### **Software Installation**

Download D-LAB Setup from the <u>Ergoneers FAQ</u> page and follow the installation instructions. Connect the license dongle to the D-LAB computer and start D-LAB.

When using Dikablis Glasses 3 Wireless, make sure you download D-LAB Mini with the same version number to update the wBox. For more information see page 15.

#### Start & Stop the Recording - Wireless

The start and stop of data recording is controlled by D-LAB. The subject wearing the Dikablis Glasses 3 and wBox must be within Wi-Fi range of the Mobile Router to start and stop a recoding. Start the recording by clicking the Record button (Recording tab of Measure mode). The subject can leave the Wi-Fi range during a recoding, but has to return within Wi-Fi range to stop the recording. Stop the recording by pressing the Stop button. Recorded data is stored on the wBox and has do be downloaded to the D-LAB PC for analysis (see 14W).

**CAUTION:** Only stop a Recording when Subject is within Wi-Fi range. Check to make sure live stream of the DG3 scene camera is visible, the status of the Eye-Tracker is "Recording" (in the Recording Device window) and the "CON" LED on the wBox is green before stopping a recording.

**NOTE:** Check the battery charge level and free storage on the wBox before starting a recording. See p.8 how to free up memory.

## **QUICK START GUIDE - RECORDING - WIRELESS**

**DIKABLIS GLASSES 3 WIRELESS – ANALYSIS** 

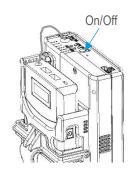

#### Turn Off wBox

Press the On/Off button on the wBox to shut it down. A short press initiates regular shutdown. A long button press will force a shutdown. Only use force shutdown if device does not shut down otherwise. All LEDs will turn off.

#### Turn Off Router

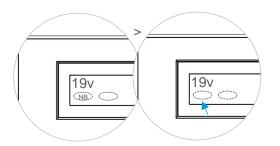

Press and hold the power button on the Mobile Router to turn it off.

#### **Turn off Battery**

Turn off the battery after each use. To do this briefly press the On / Off button. The "NB" indicator on the display will disappear and the battery will turn off in about 15-20 seconds...

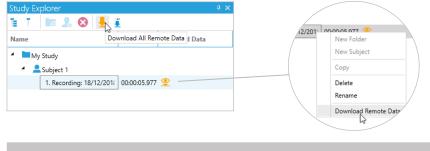

NOTE: Turn of the battery after each use. It does not turn of automatically

## QUICK START GUIDE – ANALYSIS – WIRELESS

DIKABLIS GLASSES 3 WIRELESS – ANALYSIS

#### 13 Switch to D-LAB Analyse Mode & Download Remote Data

Recorded Eye-Tracking data must be downloaded from the wBox for Analysis. Turn on the wBox and Mobile Router to connect the wBox to the D-LAB PC. Switch to Analyse Mode and click the orange arrow to download all remote data. To download a single recording, right click on the recording and select "Download Remote Data".

**NOTE:** Downloaded data will be automatically removed from the wBox after successful download.
